Greetings to [redacted] from Ted and Berneil Mueller,

You can see below that we have one email address for two people—so if one of you receives this, please let us know, forward it to the other, and please tell us the correct addresses.

My wife Berneil and I received your names and one email address from Prof. [redacted]. She is a long-time friend of ours; every year she informs us of the students who will be coming from Wuppertal.

We try to continue our friendship and relationship with Wuppertal and the students coming to Bethel. The friendship began long ago (to tell you how long ago will maybe give away our ages) — in the year 1952; we will tell you about that after you arrive.

We were in Wuppertal in September. You can see the two old people among some of the previous Wuppertal-Bethel students when we met at Katzengold. Berneil is second from right and I am back by the door.

About two weeks ago we had this year's students [redacted] at our house again, and we will see them in a few weeks, before the school term ends and they go back to Germany.

We wish to give you a welcome to Bethel College and to Kansas. We also give all arriving students an invitation to our home for an evening dinner when they arrive. We will soon wish to know from you which date you will arrive here, so we can arrange to see you. We live only a few hundred meters from the College, so it is easy for us to get there and back.

Wishes from us for the best to you two.

We look forward to seeing you here.
